## **Benefits of School Choice**

School choice has a number of benefits for students, parents, and communities. These benefits include:

- Increased student achievement
- Increased parental satisfaction
- Increased school competition
- Increased educational diversity
- Increased innovation in education

### **Increased Student Achievement**

A number of studies have shown that school choice leads to increased student achievement. For example, a study by the National Bureau of Economic Research found that students who attended charter schools in New York City had higher math and reading scores than students who attended traditional public schools.

### **Increased Parental Satisfaction**

School choice also leads to increased parental satisfaction. A study by the University of Arkansas found that parents who were able to choose their child's school were more satisfied with the quality of education their child received.

### **Increased School Competition**

School choice increases school competition. This competition forces schools to improve their quality in order to attract and retain students.

### **Increased Educational Diversity**

School choice also leads to increased educational diversity. This diversity gives students the opportunity to learn from different perspectives and experiences.

### **Increased Innovation in Education**

School choice also encourages innovation in education. This innovation can lead to new and improved ways of teaching and learning.

### **Drawbacks of School Choice**

While school choice has a number of benefits, it also has some drawbacks. These drawbacks include:

- Increased segregation
- Increased inequality
- Increased bureaucracy
- Increased cost

### **Increased Segregation**

School choice can lead to increased segregation. This is because students who are from low-income families are more likely to attend charter schools and private schools than students who are from high-income families.

### **Increased Inequality**

School choice can also lead to increased inequality. This is because charter schools and private schools are often more expensive than traditional public schools. As a result, students who are from low-income families may not be able to afford to attend these schools.

### **Increased Bureaucracy**

School choice can also lead to increased bureaucracy. This is because charter schools and private schools are subject to different regulations than traditional public schools.

### **Increased Cost**

School choice can also lead to increased cost. This is because charter schools and private schools are often more expensive than traditional public schools.

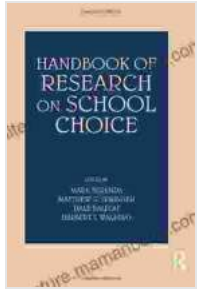

School choice is a complex issue with both benefits and drawbacks. It is important to weigh the benefits and drawbacks carefully before making a decision about whether or not to support school choice.
